ELSA Constant Flow Escape Breathing Apparatus!

DESIGNED FOR RAPID ESCAPE FROM HAZARDOUS INDUSTRIAL ENVIRONMENTS

SABRE
ELSA
EMERGENCY LIFE
SUPPORT APPARATUS

Automatic Activation

A constant flow of air is provided upon opening the ELSA bag. A quick release pin is fitted to the pressure reducing valve and attached to the bag via a strap. The action of opening the bag pulls the strap – thus releasing the pin.

Air Hood

Unique cuboid hood with elastomeric neck seal for easy donning, excellent visibility and optimum comfort. The three sided flat visor provides excellent peripheral vision with the shape helping to alleviate the feelings of restriction normally associated with escape hoods. The hood design also enables it to be worn by those with beards or glasses.

High Visibility Bag

The specifically designed bag allows for quick donning and can be comfortably carried in two orientations. Velcro strips secure the opening with tamperproof tags supplied to prevent unauthorised access. A transparent window is provided to allow the cylinder contents gauge and activated pin to be inspected without opening the bag. The stowage bag also features an adjustable webbing strap with dual point fixing for versatility.

EASILY RECHARGEABLE AND REUSABLE

Integrated Warning Whistle

The ELSA features a duration whistle which is activated when the cylinder is almost empty. Beyond this point CO₂ Carbon Dioxide within the hood will increase and the hood must be removed as soon as it is safe to do so.

Cylinder

The 15 minute apparatus uses a 3.0L, 200 bar cylinder.

Pneumatic System

The combined cylinder and pressure reducing valve is fitted to the cylinder and features a spring and piston mechanism with fixed orifice outlet.

Note: Cylinders are supplied uncharged/empty

Approvals

- AS/NZS 1716:2003 approved
- Complies with SOLAS regulations
- The ELSA is CE marked to EN1146 in accordance with EC/686/86.
- The ELSA is also Lloyd's Marine approved.
